

TOPSELLERS

PHARMA SAMPLING

The most important factor for sampling in pharmaceutical applications is for the samplers to be manufactured from high quality materials with outstanding surface qualities. Especially good processing is required for surfaces, which must not have any edges or indentations in which samples could become lodged. This is the only way to prevent cross contamination and impurities.

The Burke sample collectors presented below meet these requirements. Many of them are FDA or GMP compliant.

All-layer-sampler

For all-layer samples through all the layers of the sample.

Multi sampler

Multi sampler with several closed chambers, for multi point sampling from several predetermined sampling depths.

Uno sampler

Uno sampler made of stainless steel AISI 316L (1.4404)/PTFE with a closed sample chamber for point sampling from a predetermined sampling depth.

close-it food & pharma

close-it food & pharma a control seal ensures the necessary success when resealing sampling openings, as it reliably prevents products from leaking out after sampling. close-it food & pharma is suitable for sampling foodstuffs, pharmaceuticals, cosmetics, food additives.

► According to FDA guidelines

TOPSELLERS

Novartos

Novartos the Pharma zone sampler for sampling according to FDA guidelines for Unit-Dose-Sampling.

- ▶ The sample inserts fit precisely and can easily be replaced
- ▶ Inserts are available in volumes from 0 to 4.0 ml (0 to 0.14 oz.)
- ▶ Stainless steel AISI 316L (1.4404) / AISI 316Ti (1.4571)
- ▶ Please order inserts separately

MicroSampler

The MicroSampler has especially been designed for the sampling of small quantities of powder. Volumes of 0.2 ml (0.01 oz.), 0.5 ml (0.02 oz.), 1.0 ml (0.03 oz.), 2.0 ml (0.07 oz.), 5.0 ml (0.17 oz.) and 10 ml (0.34 oz.) can be sampled easily, quickly and cleanly from different sampling depths from sacks or containers. The tips of the MicroSampler are interchangeable. This means that tips with different volumes can be used.

- ▶ Point sampling
- ▶ Various lengths and volumes are available
- ▶ Tip can be removed, easy cleaning
- ▶ Stainless steel AISI 316L (1.4404)
- ▶ Sterilizable
- ▶ Additional tips are available in different sizes

PharmaScoop

This sample scoop PharmaScoop has been developed in order to meet the high requirements of the pharmaceutical industry, such as those contained in the FDA regulations. Like all samplers for the pharmaceutical industry, they are made of stainless steel AISI 316 without edges, crevices or undercuts in which sample residues could collect and contaminate subsequent samples. The highly polished inner and outer surfaces of the scoop therefore meet all the requirements for GMP compliance in production and sampling.

- ▶ Stainless steel AISI 316 (1.4404)
- ▶ GMP conform
- ▶ Highly polished

TOPSELLERS

DispoSamplers, disposable

The DispoSamplers are used to take samples of liquids, viscous media, powders and granulates. Unlike conventional reusable samplers, disposable samplers do not need to be cleaned after use.

① **LiquiDispō:** The LiquiDispō disposable sampler can be used to take samples of liquids from highly liquid to slightly viscous.

② **ViscoDispō:** The ViscoDispō disposable sampler can be used to take samples of high-viscosity media up to 100.000 mPas.

③ **PowderDispō:** PowderDispō is the ideal disposable sampler for cross-section samples of powdery or slightly cohesive substances.

④ **ZoneDispō:** The ZoneDispō disposable all-layer sampler is used in sampling to collect a representative all-layer sample from three different layers.

The disposable scoop is ideal for powders, granulates and pastes. The scoop with transparent cover can be closed immediately after sampling and the exclusion of contamination can therefore be safeguarded.

- ▶ PS, white, sterilized, disposable
- ▶ Individually packaged
- ▶ 10 pieces per pack
- ▶ Production, assembly and packaging according to clean room class 7
- ▶ Complies with EU food requirements and FDA regulations

 Also available in blue version

SteriPlast® sample spoon, disposable

The sample spoon is available in two sizes, 2.5 ml (0.08 oz.) (similar to a teaspoon) and 10 ml (0.34 oz.) (similar to a tablespoon), and is ideal for sampling powders, granulates and fluids.

- ▶ PS, white, sterilized, disposable

SteriPlast® sample spatula, disposable

The sterilized sample spatula is ideal for sampling powders, granulates and pastes. The spatula with transparent sealing sleeve can be closed again immediately after sampling and the exclusion of contamination can be safeguarded for the sterile sample taken.

Mini ViscoSampler | for small quantities

Sampler for viscous substances such as pastes, mud, creams, oils. The sample is drawn in using the pump rod and directly conveyed to the sampling container. Easy cleaning for flawless sampling. Depending on the viscosity, the removable suction tip can be fitted with suction drills of 2 mm to 6 mm (0.08 to 0.24 in.).

- ▶ Stainless steel AISI 316L (1.4404), seals PTFE
- ▶ Sterilizable
- ▶ Ideal for the pharmaceutical and cosmetics industry
- ▶ Incl. suction tip 2 mm (0.08 in.)
- ▶ 15 mm (0.59 in.) Ø

ViscoSampler

ViscoSampler with powerful suction for viscous media. The media is drawn up and discharged using the suction flask. Made of transparent PP or ultra-pure and chemically inert PTFE/FEP for contamination-free sampling. Specially developed for viscous substances, for example, slurries, silt, wet clay and soil samples, soil sediments, oils, emulsions, creams etc.

DispoDipper

Sampling tube manufactured in a clean room specially designed for disposable use. Due to the blue colour, it is also perfect for use in the food, animal feed and pharmaceutical indus-

tries. DispoDipper is completely manufactured in one piece and can be used for sampling and subsequent transport of the sample in one device.
